Universidade Federal do Rio Grande do Sul

Conflitos de interesse

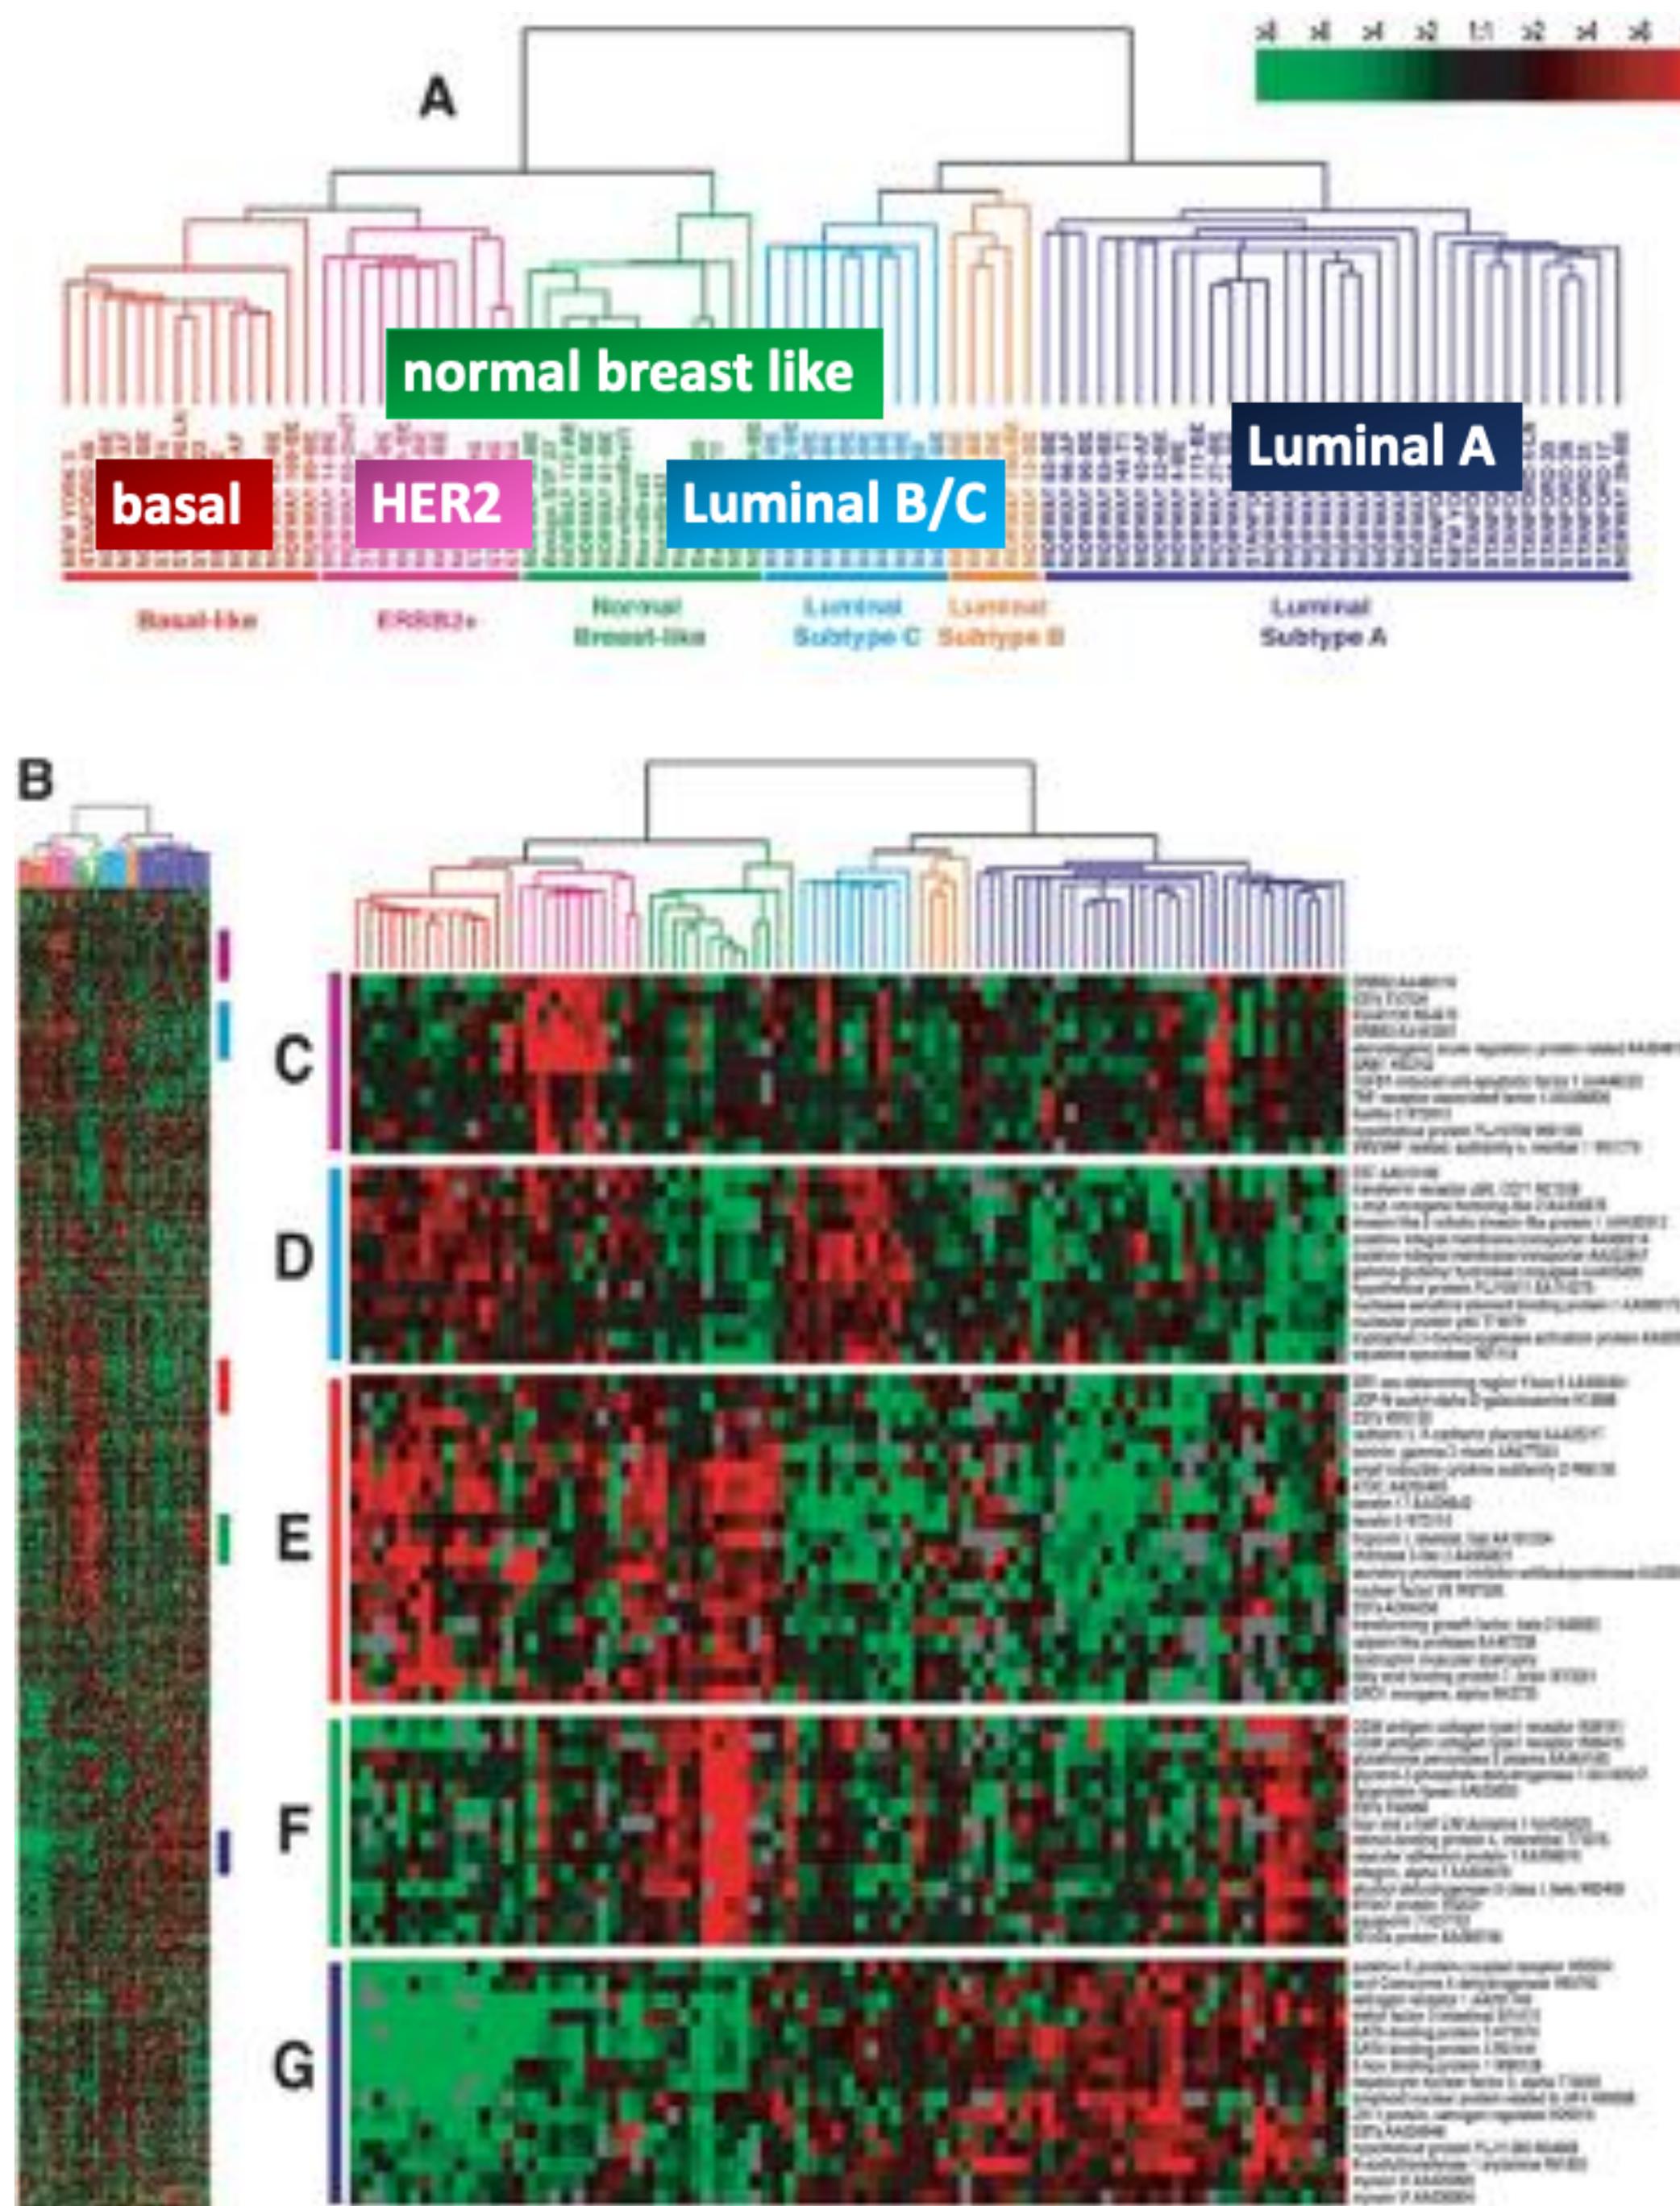

De acordo com a Resolução 1595/2000 do Conselho Federal de Medicina e RDC 96/08 da ANVISA, declaro:

Consultoria: Roche, Novartis, AstraZeneca, Lilly, GSK, Sanofi, Libbs, Eisai, Pfizer, DrReddy's, Amgen, Teva, Zodiac, United Medical, MSD, Daiichi Sankyo

Participação em advisory boards: Roche, Novartis, Pfizer, AstraZeneca, Lilly, Zodiac, Teva

Os meus pré-requisitos para participar destas atividades são a autonomia do pensamento científico, a independência de opiniões e a liberdade de expressão.

ADCs were designed to address limitations of cytotoxic chemotherapy

Limitations of cytotoxic therapy

- Lack of tumor specificity
- Dose-limiting toxicity via systemic exposure of normal cells to cytotoxic agents
- Narrow therapeutic index

ADCs were designed to have an expanded therapeutic index:

Efficient and specific drug delivery to antigen-expressing tumor cells

[†] According to the 5th ESO-ESMO international consensus guidelines (Cardoso F, et al. Ann Oncol 2020;31:1625) for advanced breast cancer visceral crisis is defined as: “severe organ dysfunction, as assessed by signs and symptoms, laboratory studies and rapid progression of disease. Visceral crisis is not the mere presence of visceral metastases but implies important organ compromise leading to a clinical indication for the most rapidly efficacious therapy.”
